TECHNICAL SKILLS

ML / DL / CV
PyTorch · TensorFlow · Scikit-learn · Transformers ·
Fine-tuning · LoRA · YOLO · OpenCV

Generative AI & LLMs
Agents · RAG · LangChain · LangGraph · OpenAI · Azure
OpenAI · Bedrock

Backend & Deployment
Python · FastAPI · Docker · K8s · AWS · Azure · GCP

Data & Analytics
Pandas · NumPy · Spark · SQL Server · Power BI

Tools
Claude Code · Copilot · Cursor · n8n · Git · CI/CD

CERTIFICATIONS

- ✓ AWS Certified ML — Specialty
- ✓ Azure AI Fundamentals (AI-900)
- ✓ Gen AI with LLMs (DeepLearning.AI)

EDUCATION

B.E. Mechanical Engineering
VTU — 2020

FOCUS AREAS

- ML/DL Systems & Model Development
- LLM Fine-tuning & Evaluation
- Computer Vision & NLP
- Agentic AI & Multi-Agent Orchestration
- Cloud-Native ML Pipelines
- Intelligent Document Processing

PROFESSIONAL SUMMARY

Machine Learning Engineer with 3+ years of experience building production-grade ML/DL systems — from classical machine learning and computer vision to deep learning, LLM fine-tuning, and agentic AI. Specialized in end-to-end model development, FastAPI backend services, and cloud-native deployment on AWS and Azure. Track record of shipping intelligent products that improve accuracy by 30%+, reduce latency by 40%, and automate operations across enterprise environments.

WORK EXPERIENCE

Machine Learning Engineer

Dec 2024 — Present

PharmaForce Infosoft Insights Pvt. Ltd

- Built and deployed AI-powered backend services using FastAPI with LLM-based RAG pipelines, improving retrieval accuracy by 30% and reducing latency by 40%
- Fine-tuned LLMs locally and on AWS SageMaker for domain-specific extraction and classification tasks, improving baseline accuracy by 15%+
- Designed agentic workflows using LangChain and LangGraph for automated data analysis, query generation, and multi-step reasoning
- Built cloud-native AI invoice extraction pipeline on Azure (Functions, Blob Storage, Azure OpenAI, PyMuPDF) processing 200+ invoices/month
- Developed KYPB (Know Your Product Better) — AI product intelligence agent with dashboards for issue tracking, resolution metrics, and code quality
- Developed text-to-SQL APIs and semantic search services, cutting data request turnaround from days to seconds
- Automated defect reporting via n8n — weekly reports to 50+ stakeholders; implemented model monitoring and drift detection
- Guided 3+ development teams on efficient adoption of Claude Code, reducing average feature delivery time

Machine Learning Engineer

May 2021 — May 2023

People Tech Group

- Developed and deployed YOLOv5/v8-based computer vision service achieving 94% accuracy, reducing manual review time by 70%
- Built ML-based risk prediction models for insurance using gradient boosting and neural networks, reducing claim costs by 25%
- Implemented transfer learning pipelines for domain-specific image classification and NLP tasks
- Built end-to-end training/inference pipelines on AWS (EC2, ECR, S3); deployed containerized ML services with Docker and Kubernetes
- Engineered features from structured and unstructured data, improving model performance by 12%

KEY PROJECTS

KYPB — Know Your Product Better

AI Agents · Python · LLMs · Dashboards · Code Quality

AI product intelligence agent providing instant answers about product architecture, issues, resolution metrics, and code quality dashboards.

AI Invoice Extraction

Azure Functions · Azure OpenAI · PyMuPDF

Cloud-native pipeline extracting structured data from diverse invoice formats. 200+ invoices/month.

Text-to-SQL Platform

NLP · SQL · LLMs · FastAPI

Natural language to SQL APIs with safety guardrails. Data turnaround from days to seconds.

LangGraph Multi-Agent

LangGraph · Multi-Agent · Python

Hierarchical agent orchestration with specialized sub-agents for complex multi-step reasoning.

Kareem Agent

LLMs · Agentic AI · RAG · FastAPI · LangChain

Agentic chatbot automating support and data analysis with RAG, semantic search, and multi-step reasoning.

Computer Vision Platform

YOLOv5/v8 · PyTorch · CV · ML Ops

94% accuracy detection handling 5K+ daily requests, reducing manual review by 70%.

Semantic Search & RAG

Embeddings · Vector DB · LLMs

Hybrid dense + sparse retrieval with LLM synthesis. 30% accuracy gain over keyword search.
